

This is the new fractured ledge face developed specifically for the new 6-28.

Lifting loops balance the load during installation, perfectly aligning the units for consecutive courses.

A perfect solution for any wall, get up to 60 pieces per truckload. Easy to move around on-site with a skid loader or mini-excavator.

The tapered sides of the blocks allow for both straight and curved walls.

NEW! THE 6-28 BLOCK.

There are Stone Strong blocks. Then there's everything else. With the best and most innovative block in precast, Stone Strong Systems delivers fully and intelligently engineered retaining wall solutions that greatly reduce installation time and labor costs— with unmatched safety, durability and aesthetics. State of the art? We go one better. This is state of the block.

DRAINAGE

Innovative, hollow design provides built-in drainage.

LIGHTER

1,000 lb. weight makes jobs go faster, easier, at a lower cost.

SIZE

All landscapers can be in the big block business.

INTERLOCKING

System designed to ensure blocks stay secure and level.
